

Billi

Billi™

simply more beautiful

SPARKLING • CHILLED • BOILING • FILTERED  
INSTANTLY ON TAP

## Come home to Billi.

Meet Billi, the world's most innovative drinking water appliance.

Billi is not only smarter – Billi is more beautiful.

The brilliance of Billi is the combination of all the latest technological advances combined with the most desirable aesthetics.

Billi is the kitchen essential that offers your family the convenience of fresh, reliable filtered drinking water instantly on tap.

International and local architects and designers prefer the award winning Billi, the product leader in filtered water systems.

Billi is in sparkling form and the reasons why are crystal clear.

Enjoy fresh, filtered, sparkling water instantly with our new Sparkling range.

Our professional sparkling system allows you to adjust the level of sparkling to suit your taste, from a high density of carbonisation to lightly sparkling.

Billi. Modern, Australian and seen in all the right places.

Refreshing, tastier, healthier clean filtered water – boiling, chilled and now, sparkling.

## Simply more intelligent

Billi has the most innovative electronic temperature regulation system. The clever CO2 injection system used in the Sparkling range is a professional series system that ensures the saturation of CO2 in the water is high. This means your water tastes fresher for longer.

Our sparkling water is created in a pressurised tank so there is no wasted CO2. Depending on the level of sparkling you choose, your CO2 cylinder can last for between 200 – 350 litres.

## Simply more space

With the world's smallest unit footprint and flexible installation options, Billi is designed to maximise your kitchen cupboard space.

## Simply more energy efficient

Reduce your environmental impact and save on power bills.

Billi taps can monitor usage patterns, recognising evening and weekend changes by turning on energy saving mode to minimise your consumption.

Eco Intelligence™ software allows the B-5000 and B-4000 to operate only when required and our unique heat exchange system removes the need for cupboard ventilation or an external cooling fan.

## Simply safer

In addition to Billi's Splash Free™ technology, our insulated tap body and boiling water safety switch provide added safety and peace of mind for the whole family.

## Simply superior filtration

Enjoy healthy refreshment with Billi's sub-micron filtration. Certified by global agency NSF international, our 0.2 micron filters ensure your family enjoys the highest level of water filtration available.

XL Levered Dispenser – matte black option on flush mounted font.  
Also available in gloss black, chrome and brushed chrome.

# Dispenser options.

**XL Levered Dispenser**

## Instant boiling, chilled and ambient filtered water systems.

### B-6000

#### Instant boiling and chilled filtered water system.

The flagship of our Billi range, the B-6000 is perfect for entertaining. Its space-saving efficiency and elegant functional style are designed for high use and meet green building design principles, providing you with the ultimate in environmentally sensitive appliances.

### B-5000

#### Instant boiling and chilled filtered water system.

The most popular of the Billi range is the B-5000, our combined boiling and chilled filtered water system.

The B-5000 Sparkling adds an extra dimension with the inclusion of fresh sparkling water - all from one dispenser.

### B-4000

#### Instant boiling and filtered water system.

The Billi B-4000, the most space-saving of all the Billi drinking water systems, allows you to keep control of your cupboard while enjoying the convenience of instant boiling and an unlimited supply of filtered water whenever you need it.

### B-5000 Sparkling

#### Instant sparkling, boiling and chilled filtered water system.

The B-5000 Sparkling is now the simplest way to enjoy instant professional sparkling water in your home. With the ability to adjust the CO2 pressure up to 5 bar, you can choose the level of sparkle in your water.

The CO2 injection system used ensures that there is a high saturation of CO2 in the water, meaning that your water tastes better for longer. The B-5000 Sparkling is only available with the XL Dispenser option.

Billi Model	Sparkling	Boiling	Chilled	Filtered	H x W x D (mm)	Product code
B-6000		●	●	●	340 x 315 x 365	916000
B-5000 Sparkling	●	●	●	●	385 x 240 x 325 340 x 180 x 360	915110
B-5000		●	●	●	340 x 180 x 500	915000
B-4000		●		●	340 x 180 x 360	914000
B-3000 Sparkling	●		●	●	385 x 240 x 325	913110
B-3000			●	●	340 x 180 x 460	913000
B-1000				●	320 x 140 x 130	911000

Chrome XL Levered dispenser comes as standard with the B-6000, B-5000 and B-4000. The font is an optional extra.

XL Levered Dispenser in standard chrome finish on optional flush mounted font.  
Also available in gloss black, matte black and brushed chrome.

## Slimline dispenser options.

**Slimline Dispenser  
– B-3000 Sparkling.**

**Slimline Dispenser  
– brushed chrome option.**

### Dispenser finishes.

*The standard finish for the dispenser is bright chrome. Optional finishes include brushed chrome, matte and gloss black.*

### Optional slimline dispensers.

*A choice of square or rounded slimline tap styles for the B-1000 and B-3000, gives you the perfect opportunity to match it with surrounding design elements.*

## Instant chilled and filtered water systems.

### B-3000

#### Instant chilled filtered water system.

Vary the temperature of your chilled filtered water to suit the seasons by using an easily adjustable control. With a large chilling capacity, the B-3000 is whisper quiet, vibration free and completely unobtrusive. Its energy efficient design minimises running costs.

### B-3000 Sparkling

#### Instant sparkling, chilled filtered water system.

The B-3000 Sparkling is now the simplest way to enjoy instant professional sparkling water in your home. With the ability to adjust the CO<sub>2</sub> pressure up to 5 bar, you can choose the level of sparkle in your water. The injection system used ensures that there is a high saturation of CO<sub>2</sub> in the water, meaning that your water has a better taste.

### B-1000

#### Instant filtered water system.

Enjoy refreshing clean filtered water in your home all day, every day with Billi sub micron filtration.

The B-1000 filter module fits comfortably in a standard shelf compartment, allowing you maximum usable cupboard space.
